

Public Information Meeting scheduled for Mill Street Improvements

Des. Nos. 2201661

The City of Jasper will host a public information meeting on Wednesday, July 23, 2025, regarding the proposed improvements to Mill Street from 30th Street to 36th Street in Jasper, Indiana.

This project is being developed to improve safety, accessibility, and overall roadway conditions. The current layout of Mill Street does not meet today's roadway design standards, and several areas experience drainage issues and limited visibility due to steep hills.

To address these concerns, the project will widen the road to provide two 12-foot lanes with 6-foot shoulders, add curbs and storm drains to maintain drainage, and smooth out the road's profile to enhance visibility and safety. These upgrades are part of the city's ongoing efforts to support industrial access, reduce long-term maintenance needs, and create safer, more functional roadways.

The meeting will take place at the following location:

Jasper City Hall – Council Chambers

610 Main St, Jasper, IN 47546

At **approximately 6:30 p.m.**, or immediately following the Jasper City Council meeting, whichever is later. Attendees will have an opportunity to view project displays and speak with members of the project team prior to a brief presentation that will begin at **7:00 p.m.** Project team members will be available to answer questions and comment forms will be available.

Any questions or comments or accommodation requests should be directed to Nicole Minton at Nicole.Minton@lochgroup.com.
